

Application

A cubic dry goods container with removable bifold gates and lid. Originally designed to the stringent requirements of Australia Post, incorporating the latest ergonomic considerations for one person to fold or erect the container. It combines the strength of a galvanised steel base with the flexibility of cobalt plated mesh sides, all in a patented foldable frame.

Applications include:

- General Hardware
- Automotive parts and accessories
- Postal Freight

Specifications

	Length	Width	Height	Weight	Working Load
Upright (external)	1170	1170	1140	95 kgs	Up to 1000 kgs
Upright (internal)	1130	1130	940		1.2m ³ volume
Folded	1168	1168	371		
Stacking Height	Loaded	Empty			
In transit	2	7			
Static	5	17			

Features and Benefits

- Lightweight yet durable construction.
- Patented interlocking spigots, provides extra stability during transport and positive alignment during stacking.
- Half folding gates and lid allows easy loading from two sides.
- Container folds to one third size, saving on storage and transport costs.
- Environmental benefits from reduced packaging materials compared with traditional bagged or boxed goods.
- Durable galvanised base construction with four way entry providing years of reliable service.
